

Yash Sachdev

Indore | yashsachdev007@gmail.com | Portfolio-website | 83194 41884

Technical skills

- Programming Languages: JavaScript, C/C++
- Frontend: React.js, CSS, Bootstrap, Tailwind CSS
- Backend: Node.js, Express.js
- Databases: PostgreSQL, MySQL, MongoDB
- AI/ML and Computer Vision: YOLOv8, OpenCV (basics), Pose Estimation, Face Recognition
- Developer Tools: Visual Studio Code, Postman, Version Control: Git

Education

Acropolis institute of technology and research 2021-2025
B.Tech (Hons.) in Computer Science and Engineering

- GPA: 7.53
- **Coursework:** Operating system, database management system, Computer Architecture, Computer Networks, Cybersecurity, Machine learning, Computational Theory

HSC - CBSE 2021
Score: 87.4

SSC - CBSE 2019
Score: 83.8

Projects

Detection AI: Real-Time Computer Vision Surveillance Platform Live

- a full-stack video intelligence platform using React, TypeScript, FastAPI, PostgreSQL, and a Python CV worker for real-time camera monitoring, alerting, and admin reporting.
- Developed multi-model detection pipelines using YOLOv8 (object detection), YOLOv8-pose (posture analysis), and OpenCV (YuNet/SFace) to identify people, employees, vehicles, and zone-based violations.
- Implemented rule-based event detection (restricted zones, worker tracking), snapshot logging, and JWT-based admin dashboards for monitoring, reporting, and access control.

AI-Powered Resume Builder Live

- Built a full-stack AI-powered resume builder using the MERN stack, enabling users to create, customize, and manage professional resumes with real-time updates and live previews.
- Designed a scalable backend with secure JWT-based authentication and RESTful APIs, alongside a modular React frontend for a responsive and seamless user experience.

Fatigue Detection System Using Webcam Live

- Real-time drowsiness detector using MediaPipe Face Mesh (478 landmarks), Eye Aspect Ratio (EAR) and head pose estimation to classify Alert / Warning / Drowsy states
- Built per-person calibration that eliminates false positives by computing a unique EAR threshold per user — unlike hardcoded approaches

CERTIFICATIONS

- NPTEL: C Programming, Discrete Mathematics, Python for Data Science, Cybersecurity, Affective Computing
- NPTEL Discipline Star Award
- Complete Web Development Bootcamp - Udemy (Angela Yu)
- Recognized for academic excellence in technical subjects through NPTEL.
